

Production Loss Accounting (PLA)

Course #1518

Course Details

Length: 1 day

Prerequisite: APM Framework - User

Benefits: This learning module is designed to provide a broad overview into the functionality of Production Loss Accounting including core concepts, Best Practice, and general procedures.

Audience: General Users, Implementers, Administrators, and Managers.

Overview

Production loss Accounting (PLA)

Production Loss Accounting is part of the Meridium APM Framework. It allows you to manage production goals, document actual production, track production events, and reconcile production losses.

By analyzing and evaluating the data in Production Loss Accounting, you can easily identify ways to reduce unplanned downtime and increase production.

This course will introduce you to the Production Loss Accounting workflow in the context of scenarios for entering and interpreting production data.

Production Loss Accounting (PLA)

Course #1518

Training Agenda

Overview of Production Loss Accounting

- Launching PLA
- Accessing and Navigating PLA Administrative Tasks
- Viewing Products
- Viewing Production Event Codes
- Viewing Losses with Impact Codes
- Production Plan Management
- Accessing a Production Plan
