

Metrics - Overview

Course #0103

Course Details

Length: ½ day

Prerequisite: Meridium - Overview

Benefits: This course provides an overview of the Metrics tools you may use to deliver Key Performance Indicators (KPI's) across your organization.

Audience: Managers, General Users

Overview

Key Performance Indicators

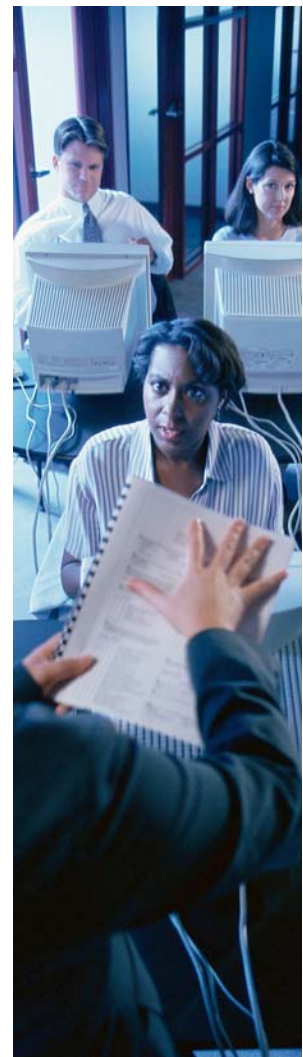

You can use Metrics tools to create Key Performance Indicators for the variables that best reflect your mission success or organizational performance over time.

Scorecards

You can create Scorecards, which provide a graphical status report on a particular KPI.

Metric Views

A Metric View offers a graphical representation of selected data from a Metric Cube. You will learn about the available tools for creating, manipulating, and viewing Metric Views.

Metrics - Overview

Course #0103

Training Agenda

Working with Scorecards

- Navigating a Scorecard
- Viewing Scorecard data and trends
- Perspectives, Objectives, and KPI's
