

Meridium – Security Administration

Course #2011

Course Details

Length: 1 day

Prerequisite: Meridium - Administration

Benefits: This course is designed to provide the necessary knowledge and skills to set up and maintain security for Meridium Application Users and Groups.

Audience: Administrators, Implementers

Overview

Security Configuration

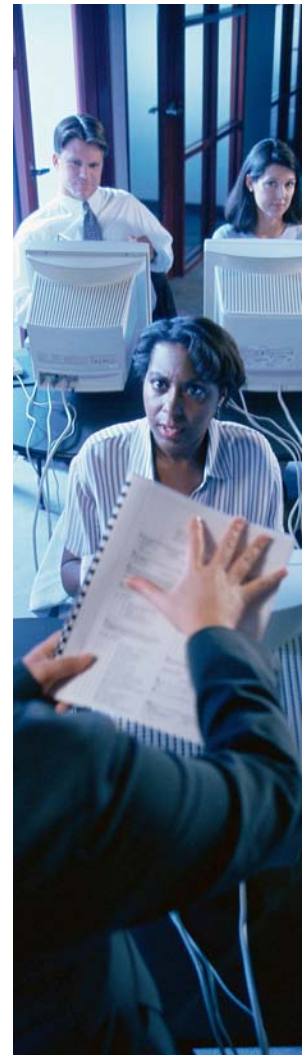

You will create Security Users and Groups and grant them permissions to selected families, relationships, and catalog directories.

Group Home Pages

You will create a Group Home Page for every Security Group, to provide its members access to the particular objects and links they will need.

Role Security Groups

You have the option to create Super Users or create and assign users to three available Role Security Groups.
