

Meridium Reporting - SSRS

Course #3004

Course Details

Length: 1 day

Prerequisite: Meridium User

Benefits: You will apply formulas, formatting, graphing, etc., to enhance Meridium reports in SQL Server Reporting Services (SSRS).

Audience: Administrators, Implementers

Overview

Basic Formatting

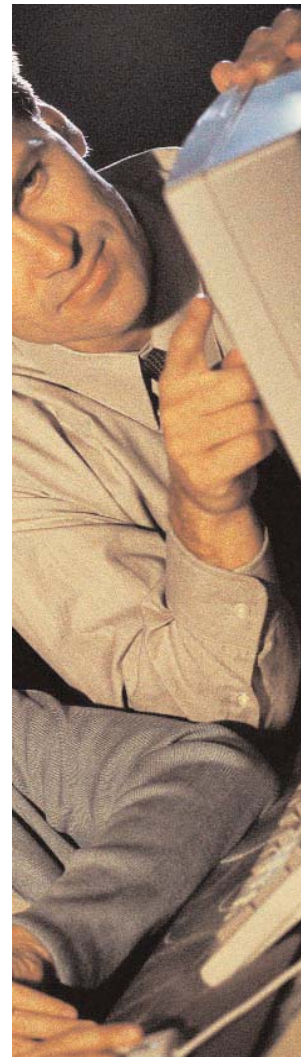

In Meridium, you will build queries and create reports based on their results. In SSRS, you will add headers and data fields to the report and format them.

Grouping and Sorting

You will apply grouping and sorting to a report and learn how to hide duplicate values and format Currency fields.

Advanced Formatting

You will learn how to insert graphs, logos, and pictures into a report. You will also learn how to apply conditional formatting, enable drilldown functionality, and create a Matrix Report.

Meridium Reporting - SSRS

Course #3004

Training Agenda

Building a Meridium Report

- Creating a Simple or Relationship Query
- Creating a report based on query results
- Accessing the report in SQL Server Reporting Services

Basic Formatting in SSRS

- Adding a Report Header
- Adding and formatting data fields
- Viewing the enhanced report in Meridium

Grouping and Sorting

- Inserting groups into a report
- Currency formatting
- Applying sorting in a report
- Hiding duplicate values

Conditional Formatting

- Applying conditional formatting
- Highlighting alternate rows to improve readability

Graphs

- Inserting a picture into a report
- Inserting a graph into a report

Advanced Formatting

- Building a Failure Cost Report
- Adding a logo to a report
- Enabling drilldown in a report
- Advanced Formatting Lab

Working with Sub-reports

- Creating a Matrix Report
- Adding a page footer
- Linking to a sub-report
