

Product Overview Series

Course #4001

Course Details

Length: 1-3 days

Prerequisite: none

Benefits: This is a series of two or more Overview courses taught back-to-back.

Audience: Managers, General Users, Implementers

Overview

This series consists of two or more Overview courses, and is designed to give Managers and Executives an understanding of APM and the Meridium tools used to support it. Each Overview course lasts about half a day, so the length of the series will depend upon the number of courses selected. The available courses are as follows:

Meridium – Overview (#0109)

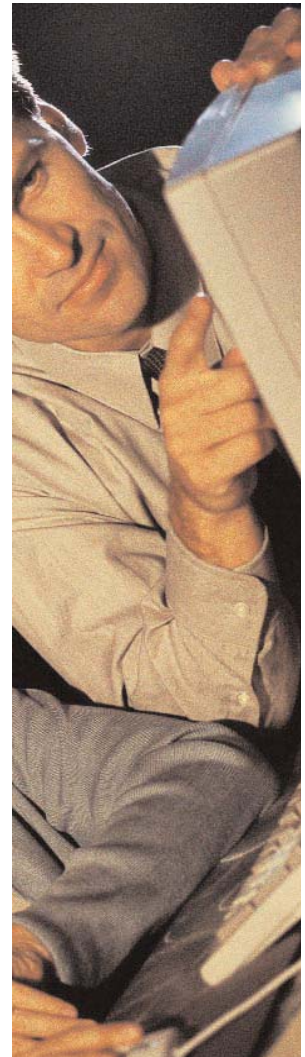

Inspection Management – Overview (#0102)

Metrics – Overview (# 0103)

PROACT® for Meridium – Overview (#0104)

Reliability – Overview (#0106)

Thickness Monitoring – Overview (#0107)

Product Overview Series

Course #4001

Following is a sample training agenda for a two-day Product Overview Series, consisting of four Overview Courses:

Sample Day One Agenda

Meridium – Overview (#0109)

This course is designed to provide an overview of the core Meridium functionality.

Metrics – Overview (# 0103)

This course provides an overview of the Metrics tools you may use to deliver Key Performance Indicators across the enterprise.

Sample Day Two Agenda

Reliability – Overview (#0106)

This course provides an overview of the Reliability Manager tools, which you may use to analyze your existing maintenance, predictive, and process data.

PROACT® for Meridium – Overview (#0104)

This course provides an overview of the PROACT® for Meridium tools, which can be used to identify the root causes of failure.
